Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Information and Current Analysis Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606) or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020		

You can also visit our World Wide Web site:

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 62-010-XPB, is published Quarterly as a standard paper product. The prices for delivery in Canada are $25.00 per issue and $83.00 for a one-year subscription, and outside Canada for US $25.00 per issue and US $83.00 for a one-year subscription. Please order by mail, at Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6; by phone, at **(613) 951-7277** or **1 800 770-1033**; by fax, at **(613) 951-1584** or **1 800 889-9734**; or by Internet, at order@statcan.ca. For changes of address, please provide both old and new addresses. Statistics Canada products may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

This product is also available on the Internet as Catalogue no. 62-010-XIB for CDN $19.00 per issue or CDN $62.00 for a one-year subscription. Users can obtain single issues or subscribe at http://www.statcan.ca/cgi-bin/downpub/feepub.cgi.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section de l'information et de l'analyse courante, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9606) ou à l'un des centres de consultation régionaux de Statistique Canada :

Renseignements sur les commandes et les abonnements

Les prix ne comprennent pas les taxes de vente

Le produit n° 62-010-XPB au catalogue paraît trimestriellement en version imprimée standard. Au Canada, un numéro coûte 25 $ et un abonnement d'un an coûte 83 $. À l'extérieur du Canada, un numéro coûte 25 $US et un abonnement d'un an coûte 83 $US. Veuillez commander par la poste, en écrivant à Statistique Canada, Division de la diffusion, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6; par téléphone, en composant le **(613) 951-7277** ou le **1 800 770-1033**; par télécopieur, en composant le **(613) 951-1584** ou le **1 800 889-9734**; ou par Internet, en vous rendant à order@statcan.ca. Lorsque vous signalez un changement d'adresse, veuillez nous fournir l'ancienne et la nouvelle adresses. On peut aussi se procurer les produits de Statistique Canada auprès des agents autorisés, dans les librairies et dans les bureaux régionaux de Statistique Canada.

On peut aussi se procurer ce produit sur Internet (n° 62-010-XIB au catalogue). Un numéro coûte 19 $CAN et un abonnement d'un an coûte 62 $CAN. Pour obtenir un numéro de ce produit ou s'y abonner, les utilisateurs sont priés de se rendre à http://www.statcan.ca/cgi-bin/downpub/feepub_f.cgi.

Normes de service à la clientèle

Statistique Canada s'engage à fournir à ses clients des services rapides, fiables et courtois et dans la langue officielle de leur choix. À cet égard, notre organisme s'est doté de normes de service à la clientèle qui doivent être observées par les employés lorsqu'ils offrent des services à la clientèle. Pour obtenir une copie de ces normes de service, veuillez communiquer avec le centre de consultation régional de Statistique Canada le plus près de chez vous.

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available
... figures not appropriate or not applicable
– nil or zero
-- amount too small to be expressed
p preliminary figures
r revised figures
x confidential to meet secrecy requirements of the Statistics Act

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres non disponibles
... n'ayant pas lieu de figurer
– néant ou zéro
-- nombres infimes
p nombres provisoires
r nombres rectifiés
x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique) Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Announcement

Several changes were made to the Consumer Price Index (CPI) starting with the January 1998 data released on February 27, 1998

1) The time base used to present the CPI was updated from 1986=100 to 1992=100.

2) The basket of goods and services used to calculate the CPI was updated to reflect changes in consumer spending patterns. Expenditure patterns for 1996 replaced those for 1992.

3) Minor modifications were made to the commodity classification system. Most notably, the aggregate "purchase and rental of automotive vehicles" changed.

For further information, please contact your regional Statistics Canada Office or contact Prices Division

Phone: (613) 951-9606,
Facsimile: (613) 951-1539
e-mail: infounit@statcan.ca.

Annonce

Plusieurs changements ont été apportés à l'indice des prix à la consommation (IPC) avec la publication des données de janvier 1998, diffusées le 27 février 1998.

1) La période de base 1986=100 utilisée pour la présentation de l'IPC fut change à 1992=100.

2) Le panier des biens et services utilisés pour le calcul de l'IPC sera mis à jour pour tenir compte de l'évolution des régimes de dépenses de consommation. Les régimes de dépenses de 1996 remplaceront ceux de 1992.

3) Des modifications mineures seront apportées au système de classification des produits. Plus particulièrement, l'agrégat «achat et location de véhicules automobiles» changera.

Converting consumer price indexes from 1992=100 to earlier official time bases

Series on the 1986 time base were discontinued in December 1997. Exceptions were made from the All-items series for Canada, the provinces and the cities for which the CPI is published. Statistics Canada has a policy of maintaining these series on one previous time base. This policy recognizes that in many contracts these series are tied to a time base. The policy provides users with an opportunity to modify their contracts.

Parties to a contract are encouraged to use indexes on the time base in effect at the time of the adjustment rather than indexes on older official time bases primarily because information is more readily available on the current time base. The differences in movements between bases are small and do not consistently give an advantage to one party or the other.

The 1986 based All-items series are identical to those published for the period up to December 1997. Since the 1992 based monthly series was obtained by dividing by a conversion factor, the 1986 based indexes will be obtained by multiplying the 1992 monthly-based indexes by the same factor for the period starting in January 1998.

All-items indexes on earlier time bases are still available from Statistics Canada. Users may, however, calculate their own indexes. Statistics Canada suggests they be calculated directly from the 1992 time base to the time base desired, rather than through the intervening official time bases, in order to minimize rounding issues. A table showing the factors to use when converting to previous official time bases is shown on the next page.

This type of arithmetic conversion of time bases applies to monthly indexes only. The annual average for a series is not obtained directly by applying the series' conversion factor. Instead, the monthly series is converted and then the annual average is calculated as the average of the twelve monthly indexes of the calendar year.

For more information, see "Changing the CPI to a New Official Time Base(1992=100). In the August 1997 issue of The Consumer Price Index (62-001.XPB).

Conversion des indices des prix à la consommation de la période de base 1992=100 à une période de base officielle antérieure

Les séries de la période de base 1986 ont pris fin en décembre 1997, à l'exception des séries de l'indice d'ensemble pour le Canada, les provinces et les villes pour lesquelles l'IPC est publié. Statistique Canada a comme politique de préserver de telles séries pour une période de base antérieure, car il sait pertinemment que, dans de nombreux contrats, ces séries sont reliées à une période de base. La politique offre aux utilisateurs l'occasion de modifier leur contrat.

Les parties à un contrat devraient utiliser les indices de la période de base en vigueur au moment du rajustement, plutôt que les indices d'anciennes périodes de base officielles, en grande partie parce que l'information est plus facilement disponible pour la période de base courante. Les écarts de mouvement entre deux périodes de bases sont infimes et n'avantageront pas nécessairement toujours une partie au détriment de l'autre.

La série d'ensemble pour 1986 sera identique à celle qui a paru pour la période prenant fin en décembre 1997. Étant donné qu'on a obtenu la série mensuelle sur la base de 1992 en divisant l'indice par un facteur de conversion, on obtiendra les indices sur la période de base de 1986 en multipliant l'indice sur la base de 1992 par le même facteur. À compter de janvier 1998.

On ne pourra pas obtenir de Statistique Canada les indices d'ensemble d'autres périodes de base antérieures. Toutefois, les utilisateurs pourront calculer leurs propres indices. Statistique Canada suggère, afin de minimiser les problèmes d'arrondissement, de les calculer directement de la période de base de 1992 à la période de base souhaitée, plutôt qu'en faisant intervenir les périodes de base officielles entre les deux points en question. Un tableau indiquant les facteurs à utiliser pour effectuer une conversion à une période de base précédente est présenté à la page suivante.

Ce type de conversion arithmétique d'une période de base s'applique uniquement à des indices mensuels. L'application du facteur de conversion de la série ne permet pas d'obtenir directement la moyenne annuelle d'une série. On convertit plutôt la série mensuelle puis on calcule la moyenne annuelle comme étant la moyenne des douze indices mensuels de l'année civile.

Pour plus de renseignements, voir Vers une nouvelle année de base officielle pour l'IPC (1992=100) dans le numéro d'août 1997 de L'indice des prix à la consommation(62-100-XPB).

[1] to be used only while 1992=100 is the official time base of the CPI
[1] À n'utiliser que lorsque la période de base officielle de l'IPC est 1992=100

1996 Based Weighting Diagram of the Consumer Price index for Canada, the Provinces, Whitehorse and Yellowknife

Updated consumer expenditure patterns based on the 1996 Family Expenditure Survey have been incorporated into the calculation of the Consumer Price Index. These new weights were used for the first time when price movements between December 1997 and January 1998 were produced.

The Consumer Price Index measures the price change of a fixed basket of goods and services. Updating the CPI basket on a regular basis is necessary in order to keep the CPI relevant to Canadians. Spending patterns can be affected by such factors as composition and distribution of the population, the quality and availability of goods and services, personal incomes, wealth and consumer preference and taste. Results of the Family Expenditure Survey are used to recognize the relative importance of each commodity in the CPI basket by assigning a specific weight to each constituent. The last three Family Expenditures Surveys covered the years 1996, 1992 and 1986. The current update is based on results of the 1996 survey.

The CPI weights play an important role when analysing changes in the CPI. For example, a 5% increase in the price of a commodity such as gasoline, which has a large weight, will have a greater impact on the index than a similar increase in the price of butter, which has a smaller weight.

Table B portrays weights for selected consumer goods and services and also for selected special aggregates. Each weight represents the percentage share of the consumer budget spent on each commodity (or special aggregate) for Canada, each province, Whitehorse and Yellowknife.

Table C presents the percentage share of the total Canadian consumer budget spent by residents of each province.

The weights shown in the tables are based on expenditure values that are products of the 1996 quantities (derived from the 1996 Family Expenditure Survey) expressed at December 1997 prices. These weights can be used to combine published indexes after December 1997 only after rebasing the indexes to a December 1997=100 time base. For a description of the methodology, see Section 7.3 "Computation of Fixed-basket Indexes" in the **"Consumer price index reference paper"**, Statistics Canada, Catologue No. 62-553, Occasional.

Diagramme de Pondération sur Base 1996 de l'Indice des Prix à la Consommation pour le Canada, les Provinces, Whitehorse et Yellowknife

Les régimes révisés de dépenses de consommation fondés sur l'Enquête de 1996 sur les dépenses des familles ont été intégrés dans le calcul de l'indice des prix à la consommation. Ces nouvelles pondérations ont été utilisées pour la première fois lors de la production des mouvements de prix de décembre 1997 à janvier 1998.

L'indice des prix à la consommation mesure la variation de prix d'un panier fixe de biens et services. Il faut procéder périodiquement à la mise à jour du panier de l'IPC pour que ce dernier demeure pertinent pour les Canadiens. Les régimes de dépenses peuvent être touchés par des facteurs comme la composition et la distribution de la population, la qualité et la disponibilité des biens et services, les revenus personnels, la richesse et les préférences et les goûts des consommateurs. Les résultats de l'Enquête sur les dépenses des familles servent à reconnaître l'importance relative de chaque produit dans le panier de l'IPC par l'attribution d'une pondération déterminée à chaque composante. Les trois dernières Enquêtes sur les dépenses des familles ont porté sur les années 1996, 1992 et 1986. La présente mise à jour est fondée sur les résultats de l'Enquête de 1996.

Les pondérations de l'IPC jouent un rôle important dans l'analyse des variations de l'IPC. Ainsi, une augmentation de 5% du prix d'un produit comme l'essence, qui a une pondération considérable, a un effet plus grand sur l'indice qu'une augmentation semblable du prix du beurre, dont la pondération est moindre.

Le tableau B présente les pondérations de certains biens et services de consommation ainsi que de certains agrégats spéciaux. Chaque pondération représente le pourcentage de leur budget que les consommateurs consacrent à chaque produit (ou agrégat spécial) pour le Canada, chaque province, Whitehorse et Yellowknife.

Le tableau C présente le pourcentage du budget total des consommateurs canadiens qui est dépensé par les résidents de chaque province.

Les pondérations indiquées dans les tableaux sont fondés sur les valeurs des dépenses selon les quantités de 1996 (d'après l'Enquête de 1996 sur les dépenses des familles), en prix de décembre 1997. Ces pondérations peuvent servir à combiner les indices publiés après décembre 1997 uniquement après la conversion des indices sur la base de décembre 1997=100. Pour une description de la méthodologie, voir la section 7.3, «Calcul des indices à panier fixe», dans le **«Document de référence de l'indice des prix à la consommation»**, Statistique Canada, nº 62-553 au catalogue, hors série.

HIGHLIGHTS

Consumer Price Behaviour

First Quarter, 1998

Trends in Consumer Price Movements

Between December 1997 and March 1998, prices paid by Canadians for goods and services in the consumer price index (CPI) basket rose by 0.7%. This advance in consumer prices in the first quarter of 1998 matched the increase in the CPI between December 1996 and December 1997. The first quarter rise was primarily attributable to a 0.6% increase in prices recorded from December to January. In each of February and March, the CPI edged forward by only 0.1%. Just less than half of the 0.6% increase in January was a result of a leap in prices of fresh vegetables and fruit.

The year-over-year change in the All-items CPI was 1.1% in January, 1.0% in February and 0.9% in March.

The change in the seasonally adjusted CPI expressed at annual rates was 1.5% in the first quarter of 1998. The seasonally adjusted annual rates of the major components ranged from a high of 7.3% for Tobacco and Alcohol to a low of -0.7% for Transportation. The strong advance in the Tobacco and Alcohol index was primarily due to cigarette tax increases levied in February. A large decline in the price of gasoline in the first quarter was mainly responsible for the drop in the seasonally adjusted Transportation component.

Contributions by selected components (not seasonally adjusted)

Sharp increases in the price of fresh vegetables and rising charges for telephone and cablevision services were the major factors exerting upward pressure on prices in the first three months of 1998. Other noteworthy price gains were recorded in women's clothing, packaged holiday tours, new automotive vehicles and tobacco products. The major factor exerting downward pressure on prices in the first quarter was a steep drop in the price of gasoline. Rate reductions for piped gas and lower beef and pork prices also served to moderate first quarter price increases.

The price of fresh vegetables rose by 21.1% in the first quarter of 1998. This sharp increase in prices was primarily due to poor growing conditions caused by cold and rainy weather in certain parts of the southern United States. Prices were up considerably all across Canada especially in Saskatchewan, Alberta and B.C.

Many residents of Canada saw their phone bills increase in the first quarter of 1998. In January, local telephone rates rose as the third of three annual rate increases approved by the CRTC was implemented.

The price of cablevision services rose in the first quarter when cable distributors withdrew the free specialty channels they had been providing in recent months. Note that when cable companies initially offered these channels at no additional cost to cable viewers, it was treated as a price decline.

A 5.0% advance in the price of women's clothing in the first quarter was widespread as all garment categories showed price increases greater than three percent. Although the price of women's clothing usually increases in the first quarter, this quarter's advance was stronger than usual.

The price of travel tours rose sharply (12.0%) in the first quarter of 1998. Travel tour packages are priced in January, February and March of each year when Canadians generally travel to southern destinations. In February, travel tour rates increased by 14.4%. Some operators introduced a surcharge that month in order to help offset the negative impact of the weak Canadian dollar. Annual increases in travel tour rates have exceeded the rise in the All-items CPI for almost four years.

FAITS SAILLANTS

Comportement des prix à la consommation

Premier trimestre de 1998

Tendances des mouvements de prix à la consommation

Entre décembre 1997 et mars 1998, les Canadiens ont payé 0,7% plus cher les biens et services du panier de l'indice des prix à la consommation (IPC). Cette progression des prix à la consommation au premier trimestre de 1998 a été la même que celle de l'IPC entre décembre 1996 et décembre 1997. L'augmentation du premier trimestre était essentiellement attribuable à une hausse de prix de 0,6% observée entre décembre et janvier. En février et en mars, l'IPC n'a gagné que 0,1%. Un peu moins de la moitié du gain de 0,6% en janvier était la conséquence d'un bond des prix des légumes et fruits frais.

La variation d'une année à l'autre de l'IPC d'ensemble a été de 1,1% en janvier, de 1,0% en février et de 0,9% en mars.

La variation de l'IPC désaisonnalisé, exprimée en taux annuels, a été de 1,5% au premier trimestre de 1998. Les taux annuels désaisonnalisés des principales composantes se situaient entre un sommet de 7,3% pour le tabac et l'alcool et un creux de -0,7% pour les transports. La forte hausse de l'indice du tabac et de l'alcool venait d'abord et avant tout des augmentations de taxes sur les cigarettes imposées en février. Une repli important du prix de l'essence au premier trimestre a été le principal facteur de la chute de la composante désaisonnalisée des transports.

Contributions de certaines composantes (non désaisonnalisées)

Les hausses marquées du prix des légumes frais et des tarifs des services de téléphone et de câblodistribution ont été les principaux facteurs d'entraînement des prix au cours des trois premiers mois de 1998. Parmi les autres gains dignes de mention, il faut mentionner les vêtements pour femmes, les voyages organisés, les véhicules automobiles neufs et les produits du tabac. Le principal facteur de ralentissement des prix au premier trimestre a été une chute marquée du prix de l'essence. Des réductions de tarifs du gaz et une baisse de prix du porc et du bœuf ont aussi contribué au ralentissement de la progression des prix au premier trimestre.

Le prix des légumes frais a monté de 21,1% au premier trimestre de 1998. L'augmentation considérable des prix est principalement attribuable aux mauvaises conditions de culture dues au climat froid et pluvieux qui a sévi dans certaines régions du Sud des États-Unis. Les prix ont grandement augmenté au pays, surtout en Saskatchewan, en Alberta et en Colombie-Britannique.

De nombreux résidents du Canada ont vu leur facture de téléphone augmenter au premier trimestre de 1998. En janvier, les tarifs locaux ont monté avec la mise en œuvre de la troisième des trois augmentations annuelles de tarifs approuvées par le CRTC.

Le prix des services de câblodistribution a augmenté au premier trimestre lorsque les câblodistributeurs ont retiré les canaux spécialisés gratuits qu'ils avaient offerts pendant quelques mois. À noter que, lorsque les câblodistributeurs ont d'abord offert ces canaux sans frais supplémentaires pour les abonnés, cela a été traité comme une baisse de prix.

Une hausse de 5,0% du prix des vêtements pour femmes au premier trimestre a été généralisée, la plupart des catégories de vêtements affichant des hausses de prix supérieures à 3%. Le prix des vêtements pour femmes monte habituellement au premier trimestre, mais la hausse de ce trimestre a été plus forte que d'habitude.

Le prix des voyages organisés a fortement augmenté (12,0%) au premier trimestre de 1998. Les prix des voyages organisés sont établis en janvier, février et mars de chaque année, soit lorsque les Canadiens voyagent généralement vers des destinations du Sud. En février, les prix des voyages organisés ont monté de 14,4%. Certains voyagistes ont appliqué des suppléments ce mois-là afin d'aider à compenser l'effet négatif de la faiblesse du dollar canadien. Les augmentations annuelles des prix des voyages organisés dépassent la progression de l'IPC d'ensemble depuis près de quatre ans.

Since new automotive vehicles have a large weight in the CPI basket, the 0.8% first quarter price advance in this commodity had a significant effect on the All-items CPI movement. Prices of new vehicles rose in January following strong sales in December. Increasing demand may have contributed to the decision by automobile manufacturers to raise prices early in 1998.

In the first quarter of 1998, the price of a package of cigarettes climbed considerably in some provinces. In February, taxes on cigarettes were raised in Ontario, Quebec, New Brunswick, Nova Scotia and P.E.I., the same provinces in which cigarette taxes were slashed in 1994.

A steep 6.4% drop in the price of gasoline in the first quarter almost matched the 6.8% plunge posted in the previous quarter. In March, the price of crude oil on world markets fell to its lowest level in over nine years. At mid-March, the world price of crude oil had fallen 31% since the November 1997 agreement by OPEC members to boost production by 10%.

A 3.2% drop in natural gas charges was primarily due to a 15.7% decline in Alberta's natural gas rates although prices also fell in B.C., Yellowknife and Whitehorse. In Alberta, the warm winter reduced demand for natural gas resulting in downward price pressure.

Beef and pork prices fell by 3.3% and 6.8% respectively over the first three months of 1998. Export demand for these products was reduced by the economic slowdown in Asia. Consequently, the larger supplies available for the domestic market exerted downward pressure on prices.

Special Aggregates

In the first quarter of 1998, higher telephone, cable and travel tour rates led the 1.1% advance in the Services index. An increase of this magnitude has not been witnessed since the first quarter of 1991.

Although weaker than the price advances exhibited by services, the first quarter increase in the Goods index (0.4%) was the strongest posted in the last four quarters. Rising food and clothing prices were primarily responsible for the advance. Semi-durables rose 2.1% led by a 5.0% increase in the price of women's clothing. Prices of durable goods advanced 0.4% in the first quarter mainly due to an increase in the cost of new automotive vehicles. Prices of non-durables slipped by 0.1% as lower gasoline charges more than offset higher fresh vegetable prices.

For the second consecutive quarter, Canadians benefited from a steep decline in energy charges. Gasoline (-6.4%), fuel oil (-3.6%) and natural gas rates (-3.2%) dropped sharply in the first quarter while electricity charges increased by a modest 0.3%.

The index for All-items excluding Food and Energy posted the largest quarterly increase (1.1%) in seven years.

Provincial CPIs

In the first quarter of 1998, Quebec led all provinces with the highest average price increases (1.1%) while Alberta was the province exhibiting the lowest average price advances (0.1%).

In Quebec during the first quarter, new automotive vehicles, fresh fruit, soft drinks and natural gas portrayed significantly higher price increases than corresponding national price movements. Price increases of new automotive vehicles in Quebec were higher than in most other provinces since Quebec's general sales tax rose from 6.5% to 7.5% in January. Prices of soft drinks and natural gas were also partially affected by the sales tax increase. In Quebec, fruit prices leaped 11.1% in January. This price hike was probably related to distribution problems created by the ice storm in that province.

In Alberta, each major component (except Transportation) exhibited price changes lower than corresponding national price movements. Piped gas, clothing and footwear, beef, telephone services and cigarettes were mainly responsible for the change in the first quarter CPI in Alberta falling considerably below the 0.7% advance recorded for Canada.

Puisque les nouveaux véhicules automobiles ont une pondération considérable dans le panier de l'IPC, l'accroissement de prix de 0,8% du premier trimestre pour ce produit a eu un effet considérable sur le mouvement de l'IPC d'ensemble. Les prix des nouveaux véhicules ont monté en janvier après de vigoureuses ventes en décembre. L'augmentation de la demande peut avoir contribué à la décision des fabricants d'automobiles de majorer leurs prix au début de 1998.

Le prix du paquet de cigarettes a considérablement augmenté dans certaines provinces. En février, les taxes sur les cigarettes ont été majorées en Ontario, au Québec, au Nouveau-Brunswick, en Nouvelle-Écosse et à l'Île-du-Prince-Édouard, c'est-à-dire dans les mêmes provinces qui les avaient grandement réduites en 1995.

Un net recul de 6,4% du prix de l'essence au premier trimestre a presque annulé la dégringolade de 6,8% du trimestre précédent. En mars, le prix du pétrole brut sur les marchés mondiaux est tombé à son plus bas niveau en plus de neuf ans. À la mi-mars, le prix mondial du brut avait fléchi de 31% depuis l'entente de novembre 1997 par laquelle les membres de l'OPEP ont décidé d'accroître la production de 10%.

Une baisse de 3,2% des tarifs du gaz naturel est principalement la conséquence d'un recul de 15,7% des tarifs du gaz naturel de l'Alberta, mais les prix ont aussi fléchi en Colombie-Britannique, à Yellowknife et à Whitehorse. En Alberta, l'hiver clément a provoqué une réduction de la demande de gaz naturel, ce qui a eu un effet de ralentissement sur les prix.

Les prix du bœuf et du porc ont chuté de 3,3% et 6,8%, respectivement, sur les trois premiers mois de 1998. La demande d'exportation de ces produits a été réduite par le ralentissement de l'économie en Asie. Par conséquent, les approvisionnements plus importants disponibles pour le marché intérieur ont eu un effet de ralentissement sur les prix.

Agrégats spéciaux

Au premier trimestre de 1998, une hausse des tarifs du téléphone, de la câblodistribution et des voyages organisés a fait monter l'indice des services de 1,1%. Une augmentation de cette ampleur ne s'était pas vue depuis le premier trimestre de 1991.

Bien que plus faible que les hausses de prix affichées par les services, l'augmentation de l'indice des biens (0,4%) au premier trimestre a été la plus forte des quatre derniers trimestres. La progression des prix des aliments et des vêtements a été le grand facteur de l'accroissement. Les biens semi-durables ont connu une hausse de 2,1%, entraînés par une augmentation de 5,0% du prix des vêtements des femmes. Les prix des biens durables ont gagné 0,4% au premier trimestre, conséquence surtout de la montée du prix des véhicules automobiles neufs. Les prix des biens non durables se sont repliés de 0,1%, la baisse des prix de l'essence ayant plus qu'effacé l'augmentation des prix des légumes frais.

Pour le deuxième trimestre consécutif, les Canadiens ont profité d'une forte baisse des prix de l'énergie. Les prix de l'essence (-6,4%), du mazout (-3,6%) et du gaz naturel (-3,2%) ont subi un net recul au premier trimestre, tandis que les tarifs de l'électricité ont réalisé une modeste progression de 0,3%.

L'indice d'ensemble sans les aliments et l'énergie a affiché la plus forte augmentation trimestrielle (1,1%) en sept ans.

IPC par province

Au premier trimestre de 1998, le Québec venait au premier rang de toutes les provinces pour les augmentations moyennes de prix (1,1%), tandis que l'Alberta a affiché les augmentations moyennes les plus faibles (0,1%).

Au Québec, au premier trimestre, les véhicules automobiles neufs, les fruits frais, les boissons gazeuses et le gaz naturel ont affiché des majorations de prix nettement supérieures aux mouvements nationaux correspondants. Les augmentations des prix des véhicules automobiles neufs au Québec ont dépassé celles de la plupart des autres provinces depuis que la taxe de vente générale du Québec est passée de 6,5% à 7,5% en janvier. Les prix des boissons gazeuses et du gaz naturel ont aussi été partiellement touchés par la majoration de la taxe de vente. Au Québec, les prix des fruits ont fait un bond de 11,1% en janvier. La hausse de prix était probablement liée aux problèmes de distribution nés de la tempête de verglas qui s'est abattue sur la province.

En Alberta, chaque grande composante (sauf les transports) a affiché des variations de prix inférieures aux mouvements nationaux correspondants. Le gaz, les vêtements et les chaussures, le bœuf, les services téléphoniques et les cigarettes ont été les principaux facteurs de la variation de l'IPC au premier trimestre en Alberta, étant restés bien en deçà de l'accroissement de 0,7% observé pour l'ensemble du Canada.

6	Ground beef, regular – Boeuf haché, régulier	1 kg	3.68	3.75	3.71
7	Pork chops – Côtelettes de porc	1 kg	8.83	8.88	8.55
8	Butt roast – Rôti de soc	1 kg	6.23	5.95	5.94
9	Chicken – Poulet	1 kg	4.27	4.10	4.11
10	Bacon	500 g	3.62	3.41	3.38
11	Wieners – Saucisses fumées	450 g	2.53	2.52	2.46
12	Canned sockeye salmon – Saumon sockeye, en conserve	213 g	3.63	3.58	3.56
13	Homogenized milk – Lait homogénéisé	1 l	1.41	1.42	1.42
14	Partly skimmed milk – Lait partiellement écrémé	1 l	1.36	1.38	1.38
15	Butter – Beurre	454 g	2.99	3.01	2.98
16	Processed cheese food slices – Préparation de fromage fondu, en tranches	250 g	2.77	2.67	2.69
17	Evaporated milk – Lait évaporé	385 ml	1.05	1.04	1.07
18	Eggs – Oeufs	1 dz	1.79	1.75	1.79
19	Bread – Pain	675 g	1.32	1.31	1.29
20	Soda crackers – Biscuits soda	450 g	1.82	1.91	1.86
21	Macaroni	500 g	0.96	0.97	0.97
22	Flour – Farine	2.5 kg	3.58	3.56	3.53
23	Corn flakes – Flocons de maïs	675 g	2.94	2.98	2.84
24	Apples – Pommes	1 kg	2.28	2.28	2.33
25	Bananas – Bananes	1 kg	1.18	1.16	1.12
26	Grapefruits – Pamplemousses	1 kg	1.26	1.25	1.32
27	Oranges	1 kg	1.73	1.73	1.76
28	Apple juice, canned – Jus de pommes, en conserve	1.36 l	1.57	1.54	1.57
29	Orange juice, tetra-brick – Jus d'orange, tetra-brick	1 l	1.69	1.65	1.66
30	Cabbage – Choux	1 kg	0.98	0.96	1.11
31	Carrots – Carottes	1 kg	1.06	1.16	1.29
32	Celery – Céleri	1 kg	1.98	1.51	1.61
33	Mushrooms – Champignons	1 kg	5.34	5.52	5.41
34	Onions – Oignons	1 kg	0.89	1.01	1.08
35	Potatoes – Pommes de terre	4.54 kg	2.83	2.86	2.88
36	French fried potatoes, frozen – Pommes de terre frites, congelées	1 kg	1.66	1.67	1.64
37	Baked beans, canned – Fèves au lard en conserve	398 ml	0.77	0.79	0.76
38	Tomatoes, canned – Tomates, en conserve	796 ml	1.17	1.19	1.17
39	Tomato juice, canned – Jus de tomate en conserve	1.36 l	1.48	1.46	1.47
40	Ketchup	1 l	2.43	2.38	2.44
41	Sugar, white – Sucre blanc	2 kg	2.40	2.39	2.42
42	Coffee, roasted – Café torréfié	300 g	4.05	3.98	3.90
43	Coffee, instant – Café instantané	200 g	5.36	5.41	5.34
44	Tea (bags) – Thé (sachets)	72	3.22	3.32	3.35
45	Cooking or salad oil – Huile à frire ou à salade	1 l	2.93	2.91	2.91
46	Soup, canned – Soupe, en conserve	284 ml	0.71	0.71	0.70
47	Baby food – Nourriture pour bébés	128 ml	0.52	0.52	0.50
48	Peanut butter – Beurre d'arachide	500 g	2.53	2.56	2.51
49	Fruit flavoured crystals – Cristaux à saveur de fruit	2.25 l	1.30	1.27	1.28
50	Soft drinks, cola type – Boissons gazeuses, cola	2 l	1.18	1.21	1.19
51	Soft drinks, lemon type – Boissons gazeuses, citron-lime	2 l	1.24	1.31	1.25
52	Laundry detergent – Détergent synthétique, en poudre	4 l	6.25	6.15	6.08
53	Paper towels (rolls) – Essuie-tout en papier (rouleaux)	2	1.60	1.60	1.62
54	Facial tissue – Papier-mouchoirs	200	1.35	1.36	1.32
55	Bathroom tissue (rolls) – Papier hygiénique (rouleaux)	4	1.74	1.74	3.27
56	Shampoo – Shampooing	300 ml	3.01	3.00	2.92
57	Deodorant – Désodorisant	60 g	2.80	2.77	2.81
58	Tooth paste – Pâte dentrifice	100 ml	1.27	1.29	1.28
59	Cigarettes	200	33.55	34.52	34.55

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1996. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1992=100. The official time base was changed from 1986=100 to 1992=100 starting with the CPI for January 1998. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. In regions where the GST and provincial retail sales taxes have been combined, the Harmonized Sales Tax (HST) is included. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1996. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30,000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1992 = 100. On a changé la période de base de 1986 = 100 à 1992 = 100 à compter de l'IPC du mois de janvier 1998. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. Dans les régions où la TPS et la taxe provinciale de vente au détail ont été combinées, la taxe de vente harmonisée (TVH) est incluse. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre

of prices required for a given commodity depends on the importance and the nature of the commodity. The samples are designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1998, the basket reflecting the 1996 expenditure patterns replaced the 1992 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1996 and 1992. Because both sets of weights are expressed in December 1997 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 (Occasional) or contact Prices Division.

de prix nécessaires pour un bien ou service donné dépend de l'importance et de la nature de celui-ci. L'échantillon est conçu de façon à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1998, le panier qui retrace la composition des dépenses de 1996 a remplacé le panier de 1992. La continuité des séries de l'IPC est assurée par un «enchaînement» des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1996 et de 1992. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1997, qui est le «mois d'enchaînement», les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

TEXT TABLE 1
Comparison of the 1996 and 1992 Distribution[1] of Expenditures used in the Consumer Price Index, by Major Component, for Canada

[1] *Le total des chiffres ne donne pas forcément 100% à cause de l'arrondissement.*

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1997 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1992 and 1997, the All-items Canada CPI rose from 100.0 to 107.6, indicating that consumers had to pay 7.6% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1997 would purchase the same amount as 92.9¢ {(100.0 / 107.6) * 100¢} did in 1992. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1997 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1992 et 1997, l'IPC d'ensemble pour le Canada est passé de 100,0 à 107,6 : les consommateurs ont donc dû débourser 7,6% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1997 achèterait la même quantité de biens et de services que 92,9 cents {(100,0 / 107,6) * 100 cents} en 1992. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L' IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTER-CITY INDEXES OF RETAIL PRICE DIFFERENTIALS

Table 10 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly consumer price indexes.

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets as far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's - Halifax
Charlottetown - Halifax
Saint John - Halifax
Ottawa - Halifax
Toronto - Montréal
Ottawa - Toronto
Toronto - Winnipeg
Regina - Winnipeg
Edmonton - Winnipeg
Edmonton - Vancouver

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, the paired city item indexes were initially compared with their counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100.

The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city weighting patterns updated for price change to the time of the inter-city retail price comparison study.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occurring in each location. Furthermore, since the retail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

Footnotes for Table 10

(2) The weights shown are rounded 1996 weights for Canada as contained in Text Table 1 of Appendix 1. They are provided for illustration only; the weights actually used are combined city weights with adjustments for price change since 1992.

(3) Includes the following sub-groups: sugar and syrups, confectionery items, margarine, other edible fat and oil items, coffee, tea, condiments, spices and vinegars, soup, infant and junior foods, pre-cooked frozen food preparations, non-alcoholic beverages and all other food preparations.

Appendice 3

INDICES COMPARATIFS DES PRIX DE DÉTAIL PAR VILLE

Le tableau 10 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie des relevés de prix utilisés pour la production de l'indice mensuel des prix à la consommation.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont d'abord été calculées séparément pour les paires de villes suivantes:

St. John's - Halifax
Charlottetown - Halifax
Saint John - Halifax
Ottawa - Halifax
Toronto - Montréal
Ottawa - Toronto
Toronto - Winnipeg
Regina - Winnipeg
Edmonton - Winnipeg
Edmonton - Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison des 11 villes étant égale à 100).

Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en applicant le schéma de pondération des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes.

Il convient de noter, surtout dans une période de fluctuation des prix, que les relations entre les prix de détail d'une ville à l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importants pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Notes pour le tableau 10

(2) Les poids indiqués sont les poids arrondis pour 1996 pour le Canada figurant dans Tableau explicatif 1 de l'appendice 1. Ils ne sont présentés qu'à titre documentaire; les poids utilisés en fait sont les poids des villes combinés rajustés en fonction des variations des prix observées depuis 1992.

(3) Comprend les sous-groupes suivants: sucre et sirop, confiserie, margarine, autres huiles et matières grasses comestibles, café, thé, condiments, épices et vinaigres, soupe, aliments pour bébés et enfants, préparations alimentaires précuites et congelées, boissons non-alcoolisées et toutes autres préparations alimentaires.

Appendix 4

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 4

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 15 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 15 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Principal commodity group	Number of items priced (if available)
Food at home	170
Meals away from home	12
Household maintenance and services	7
Household supplies	28
Communications	3
Domestic help (depending on location)	2-8
Clothing and home furnishings	29
Transportation and automobile operation	22
Health and personal care	41
Reading and recreation	51
Tobacco and alcohol	20

Canada

Success is within your reach

when you subscribe to the *Canadian Economic Observer*!

Understanding what is key to Canada's economic activity is important to virtually *every* successful business, particularly in today's highly competitive economy. Whether your company has 10 employees or 10,000, it's vital that you are equipped to anticipate the trends that could prove influential in the years ahead. One way is to subscribe to Canada's leading report card on the economy — the ***Canadian Economic Observer (CEO)***.

▶ *CEO* meets your needs

Whether your job requires you to access data, track trends or devise highly effective business plans, you'll find many uses for ***CEO***. Packed with detailed charts, diagrams and tables, ***CEO*** is your hands-on tool for understanding the economy from the inside out. And ***CEO*** gives you the kind of in-depth, intelligent analysis you have come to expect from the world's leading statistical agency.

▶ *CEO* is easy to use

Consultations with experts have contributed to ***CEO***'s present, widely acclaimed format. The **Current Economic Conditions** section contains thought-provoking commentary on current issues, trends and developments. Economic growth, trade, financial market activity — all of the major economic developments across Canada are covered month to month, issue by issue.

The **Economic Events** section profiles developments in the previous month that had an impact on the economy. ***Plus***, ***CEO*** has a topical **Feature Article** providing thoughtful insight into issues that either directly or indirectly affect all Canadians. A separate **Statistical Summary** carries a full range of hard data relating to important economic indicators: markets, prices, trade, demographics, unemployment and many others.

▶ *CEO* offers solutions

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts. You'll also receive a copy of ***CEO***'s annual ***Historical Statistical Summary*** at no additional charge.

Le succès est à la portée

des abonnés à *L'Observateur économique canadien*!

Il est important pour à peu près *toutes* les entreprises prospères de comprendre les grandes lignes de l'activité économique, surtout dans l'économie concurrentielle d'aujourd'hui. Que votre entreprise compte dix, cent ou plus de mille employés, vous voudrez sans doute vous équiper en vue d'anticiper les tendances qui peuvent exercer une influence sur les années à venir. Un bon moyen consiste à vous abonner au principal bulletin de santé économique du Canada : ***L'Observateur économique canadien (L'OEC)***.

▶ *L'OEC* répond à vos besoins

Que vous ayez à consulter des données, à répérer de grandes tendances ou à concevoir des plans d'entreprises efficaces, ***L'OEC*** répondra à nombre de vos besoins. Rempli de tableaux, de graphiques et de diagrammes détaillés, ***L'OEC*** est l'outil pratique par excellence pour comprendre les arcanes de la conjoncture économique. De plus, ***L'OEC*** vous offre le type d'analyse fouillée et intelligente à laquelle vous vous attendez d'un leader mondial dans le domaine de la statistique.

▶ *L'OEC* est simple à utiliser

Des consultations avec plusieurs experts ont fait en sorte que le nouveau format de ***L'OEC*** reçoit aujourd'hui un accueil enthousiaste de la part de nos nombreux lecteurs. La section des **Conditions économiques actuelles** comprend des commentaires percutants sur des questions, des tendances et des développements économiques. La croissance économique, le commerce, l'activité des marchés financiers – les événements économiques marquants au Canada sont examinés dans chaque numéro mensuel.

La section **Événements économiques** regroupe les faits d'actualité ayant eu un impact majeur sur l'économie au cours du mois précédent. ***En plus***, ***L'OEC*** comprend une **Étude spéciale** qui examine en profondeur des sujets qui touchent directement ou indirectement presque tous les Canadiens et Canadiennes. Enfin, l'**Aperçu statistique** contient l'ensemble des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

▶ *L'OEC* vous offre des solutions

En tant qu'abonné, vous profiterez d'une communication directe avec les analystes de Statistique Canada. Vous recevrez également, sans frais additionnels, un exemplaire du ***Supplément statistique historique de L'OEC***.

SERVICES INDICATORS

For and About Businesses Serving the Business of Canada ...

At last, current data and expert analysis on this VITAL sector in one publication!

The services sector now dominates the industrial economies of the world. Telecommunications, banking, advertising, computers, real estate, engineering and insurance represent an eclectic range of services on which all other economic sectors rely.

Despite their critical economic role, however, it has been hard to find out what's happening in these industries. Extensive and time-consuming efforts have, at best, provided a collection of diverse bits and pieces of information ... an incomplete basis for informed understanding and effective action.

Now, instead of this fragmented picture, ***Services Indicators*** brings you a cohesive whole. An innovative quarterly from Statistics Canada, this publication **breaks new ground**, providing timely updates on performance and developments in:

- *Communications*
- *Finance, Insurance and Real Estate*
- *Business Services*

Services Indicators brings together analytical tables, charts, graphs and commentary in a stimulating and inviting format. From a wide range of key financial indicators including profits, equity, revenues, assets and liabilities, to trends and analysis of employment, salaries and output – PLUS a probing feature article in every issue, ***Services Indicators*** gives you the complete picture **for the first time**!

Finally, anyone with a vested interest in the services economy can go to ***Services Indicators*** for **current** information on these industries ... both at-a-glance and in more detail than has ever been available before – all in one unique publication.

If **your** business is serving business in Canada, or if you are involved in financing, supplying, assessing or actually using these services, ***Services Indicators*** is a turning point – an opportunity to forge into the future armed with the most current insights and knowledge.

Order YOUR subscription to ***Services Indicators*** today!

Services Indicators (catalogue no. 63-016-XPB) is $116 (plus GST/HST and applicable PST) in Canada, US$116 in the United States and US$116 in other countries.

To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to **1-800-889-9734** or **(613) 951-1584** or call **1-800-267-6677** toll-free in Canada and the United States [**(613) 951-7277** elsewhere] and charge to your VISA or MasterCard. Via Internet: **order@statcan.ca**.

INDICATEURS DES SERVICES

Au sujet des entreprises au service des affaires du Canada et à leur intention...

Enfin regroupées en une publication, des données courantes et des analyses éclairées sur ce secteur ESSENTIEL!

Le secteur des services domine à l'heure actuelle les économies industrielles du monde. Les télécommunications, les opérations bancaires, la publicité, l'informatique, l'immobilier, le génie et l'assurance représentent une gamme éclectique de services sur lesquels reposent tous les autres secteurs économiques.

En dépit de leur rôle critique sur le plan économique, il est toutefois difficile de savoir ce qui se passe dans ces branches d'activité. Des efforts considérables et fastidieux ont permis, au mieux, de rassembler une collection de renseignements fragmentaires divers... qui ne favorisent pas la compréhension avisée et la prise de mesures efficaces.

Remplacez **maintenant** ce tableau fragmentaire par l'image cohérente que vous offre ***Indicateurs des services***. Cette publication trimestrielle innovatrice de Statistique Canada **pénètre dans un domaine inexploré**, fournissant des aperçus opportuns du rendement et des progrès dans les domaines suivants :

- *Communications*
- *Finance, assurance et immobilier*
- *Services aux entreprises*

Indicateurs des services rassemble des tableaux analytiques, des diagrammes, des graphiques et des observations en un mode de présentation stimulant et attrayant. En puisant à même une vaste gamme d'indicateurs financiers importants, allant notamment des profits, des capitaux propres, des recettes, de l'actif et du passif aux tendances et analyses de l'emploi, des salaires et de la production – à laquelle s'ajoute un article de fond exploratif dans chaque numéro, ***Indicateurs des services*** brosse **pour la première fois** un tableau complet!

Enfin, quiconque s'intéresse au secteur des services peut consulter ***Indicateurs des services*** pour trouver des renseignements **courants** sur ces branches d'activité... tant sous une forme sommaire qu'à un niveau de détail n'ayant jamais encore été offert – et ce, dans une même publication.

Si vous êtes de ceux qui fournissent des services aux entreprises canadiennes, ou si vous financez, fournissez ou évaluez ces services ou y avez en fait recours, ***Indicateurs des services*** représente un tournant – une chance de s'aventurer dans l'avenir en étant armé des réflexions et connaissances les plus actuelles.

Commandez dès aujourd'hui VOTRE abonnement à ***Indicateurs des services***!

Indicateurs des services (n° 63-016-XPB au catalogue) coûte 116 $ (plus TPS/TVH et la TVP en vigueur) au Canada, 116 $ US aux États-Unis et 116 $ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division des opérations et de l'intégration, Gestion de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous préférez, vous pouvez télécopier votre commande en composant le **1-800-889-9734** ou le **(613) 951-1584** ou téléphoner sans frais du Canada et des États-Unis au **1-800-267-6677** [ou d'ailleurs au **(613) 951-7277**] et porter les frais à votre compte VISA ou MasterCard.

This product is also available on the Internet as Catalogue no. 62-010-XIB for CDN $19.00 per issue or CDN $62.00 for a one-year subscription. Users can obtain single issues or subscribe at http://www.statcan.ca/cgi-bin/downpub/feepub.cgi.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available
... figures not appropriate or not applicable
– nil or zero
-- amount too small to be expressed
p preliminary figures
r revised figures
x confidential to meet secrecy requirements of the Statistics Act

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres non disponibles
... n'ayant pas lieu de figurer
– néant ou zéro
-- nombres infimes
p nombres provisoires
r nombres rectifiés
x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (nº 62-001 au catalogue) et *Prix à la consommation et indices des prix* (nº 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique) Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

This publication was prepared under the direction of:

Louis Marc Ducharme, Director, Prices Division

Cynthia Baumgarten, Assistant Director, Prices Division

Cette publication a été rédigée sous la direction de:

Louis Marc Ducharme, Directeur, Division des prix

Cynthia Baumgarten, Directeur adjoint, Division des prix

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1996. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1992=100. The official time base was changed from 1986=100 to 1992=100 starting with the CPI for January 1998. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. In regions where the GST and provincial retail sales taxes have been combined, the Harmonized Sales Tax (HST) is included. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1996. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30,000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1992 = 100. On a changé la période de base de 1986 = 100 à 1992 = 100 à compter de l'IPC du mois de janvier 1998. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. Dans les régions où la TPS et la taxe provinciale de vente au détail ont été combinées, la taxe de vente harmonisée (TVH) est incluse. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre

of prices required for a given commodity depends on the importance and the nature of the commodity. The samples are designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1998, the basket reflecting the 1996 expenditure patterns replaced the 1992 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1996 and 1992. Because both sets of weights are expressed in December 1997 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 (Occasional) or contact Prices Division.

de prix nécessaires pour un bien ou service donné dépend de l'importance et de la nature de celui-ci. L'échantillon est conçu de façon à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1998, le panier qui retrace la composition des dépenses de 1996 a remplacé le panier de 1992. La continuité des séries de l'IPC est assurée par un «enchaînement» des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1996 et de 1992. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1997, qui est le «mois d'enchaînement», les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

[1] *Le total des chiffres ne donne pas forcément 100% à cause de l'arrondissement.*

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1997 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1992 and 1997, the All-items Canada CPI rose from 100.0 to 107.6, indicating that consumers had to pay 7.6% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1997 would purchase the same amount as 92.9¢ {(100.0 / 107.6) * 100¢} did in 1992. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1997 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1992 et 1997, l'IPC d'ensemble pour le Canada est passé de 100,0 à 107,6 : les consommateurs ont donc dû débourser 7,6% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1997 achèterait la même quantité de biens et de services que 92,9 cents {(100,0 / 107,6) * 100 cents} en 1992. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L' IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTER-CITY INDEXES OF RETAIL PRICE DIFFERENTIALS

Table 10 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly consumer price indexes.

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets as far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, the paired city item indexes were initially compared with their counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100.

The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city weighting patterns updated for price change to the time of the inter-city retail price comparison study.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occurring in each location. Furthermore, since the retail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

Footnotes for Table 10

(2) The weights shown are rounded 1992 weights for Canada as contained in the report **The Consumer Price Index Reference Paper, Updating based on 1992 Expenditures (Occasional),** Catalogue 62-553. They are provided for illustration only; the weights actually used are combined city weights with adjustments for price change since 1992.

(3) Includes the following sub-groups: sugar and syrups, confectionery items, margarine, other edible fat and oil items, coffee, tea, condiments, spices and vinegars, soup, infant and junior foods, pre-cooked frozen food preparations, non-alcoholic beverages and all other food preparations.

Appendice 3

INDICES COMPARATIFS DES PRIX DE DÉTAIL PAR VILLE

Le tableau 10 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie des relevés de prix utilisés pour la production de l'indice mensuel des prix à la consommation.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont d'abord été calculées séparément pour les paires de villes suivantes:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison des 11 villes étant égale à 100).

Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en applicant le schéma de pondération des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes.

Il convient de noter, surtout dans une période de fluctuation des prix, que les relations entre les prix de détail d'une ville à l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importants pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Notes pour le tableau 10

(2) Les pondérations indiquées sont les pondérations arrondies pour 1992 pour le Canada figurant dans le Document de référence de **l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1992**, catalogue 62-553. Elles ne sont fournies qu'à titre d'exemple; les pondérations utilisées en fait sont les pondérations combinés des villes rajustés en fonction des variations des prix observées depuis 1992.

(3) Comprend les sous-groupes suivants: sucre et sirop, confiserie, margarine, autres huiles et matières grasses comestibles, café, thé, condiments, épices et vinaigres, soupe, aliments pour bébés et enfants, préparations alimentaires précuites et congelées, boissons non-alcoolisées et toutes autres préparations alimentaires.

Appendix 4

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 4

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Table 15 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Le tableau 15 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Canada: A Portrait

A Memorable Journey Through Canada

A book to captivate everyone, ***Canada: A Portrait*** is a compelling record in words and pictures of the excitement and diversity of present-day Canada. This all-new edition of Statistics Canada's proven bestseller features a striking full-colour dustjacket reproduction of *Sweetgrass*, the rich impressionistic painting by Canadian artist Frank Mayrs. Once you open its appealing cover, you will discover that ***Canada: A Portrait*** not only delights the eye, it stimulates the imagination. Each page is brimming with lively and intriguing facts, bringing to life the personality and charisma of Canada in a clear, easy-to-read and entertaining narrative.

5672900718S

From the important to the whimsical...

Canada: A Portrait presents you with the perfect opportunity to explore Canada at your leisure with just the turn of a page. Investigate the diverse regions of Canada from Mount Logan in the Yukon to the St. John River in New Brunswick. Delve into the heartbeat of Canada's society: Who are we? Where do we live? What do we believe in? See how the economy is evolving and what makes it tick. Learn about the activities enjoyed by today's Canadians, such as opera and hockey and home computers. ***Canada: A Portrait*** offers a complete examination of this unique country and reflects many interesting perspectives.

The Land, The People, The Society, Arts and Leisure, The Economy and Canada in the World

Six chapters provide a guided tour of both the physical and the human landscape of Canada. Each chapter is enriched with personal insights on "being Canadian," shared with you by such eminent people as Myriam Bédard, Gerhard Herzberg and Joe Schlesinger and is adorned with a gallery of imaginative pictorial images.

Share the *Canada: A Portrait* experience with your family, friends and colleagues

Its charming format, rich design, intriguing content and attractive price make this a keepsake volume, ideal both to give and to receive.

Canada: A Portrait is available for only $39.95 in Canada (plus GST/HST, applicable PST and shipping and handling), US $51.95 in the United States and US $59.95 in other countries. To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. Call toll-free: **1-800-267-6677** and use your Visa and MasterCard or fax your order to **1-800-889-9734**.

Un portrait du Canada

Un voyage mémorable à travers le Canada

Un portrait du Canada captivera tout le monde. C'est un recueil irrésistible, en mots et en images, de tout ce qui fait le dynamisme et la diversité du Canada d'aujourd'hui. Cette nouvelle édition de l'indiscutable best-seller de Statistique Canada offre, sur la jaquette, un magnifique paysage impressionniste, intitulé *Sweetgrass*, de l'artiste canadien Frank Mayrs. Dès la première page, vous serez fasciné par la beauté des images et du texte et vous laisserez vagabonder votre imagination. Chaque page regorge de faits vivants et intrigants donnant vie au caractère et au magnétisme du Canada dans une langue claire, simple et prenante.

De l'important au fantaisiste...

Un portrait du Canada vous permet de visiter le pays durant vos moments libres simplement en tournant les pages. Du mont Logan (Yukon) à la rivière Saint-Jean (Nouveau-Brunswick), tâtez le pouls des différentes régions du Canada. Fouillez au coeur même de la société canadienne : Qui sommes-nous? Où vivons-nous? Quelles sont nos croyances? Voyez comment l'économie évolue et pourquoi elle tourne. Découvrez les activités préférées des Canadiens d'aujourd'hui : de l'opéra au hockey jusqu'à l'ordinateur familial. ***Un portrait du Canada*** offre un examen complet de ce pays unique reflétant des perspectives intéressantes.

Le territoire, La population, La société, Les arts et les loisirs, L'économie et Le Canada dans le monde

Un tour guidé du paysage physique et humain du Canada vous est offert en six chapitres, chacun est parsemé d'oeuvres pleines d'imagination et est enrichi d'un message personnel sur le fait «d'être Canadien». Ces messages sont partagés par d'éminents Canadiens tels que Myriam Bédard, Gerhard Herzberg et Joe Schlesinger.

Partagez cette expérience avec votre famille, vos amis et vos collègues

Son format attrayant, son design riche, son contenu intrigant et son prix alléchant font d'***Un portrait du Canada*** un cadeau idéal à donner ou à recevoir.

Un portrait du Canada est en vente à seulement 39,95 $ au Canada (TPS/TVH, TVP et frais de port et de manutention applicables en sus), 51,95 $ US aux États-Unis et 59,95 $ US dans les autres pays. Pour commander, écrivez à Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6 ou communiquez avec le Centre de consultation régional de Statistique Canada le plus près (la liste figure dans la présente publication). Ou encore, téléphonez sans frais au **1-800-267-6677** et portez les frais à votre compte VISA ou MasterCard ou télécopiez votre commande au **1-800-889-9734**.

For changes of address, please provide both old and new addresses. Statistics Canada products may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

This product is also available on the Internet as Catalogue no. 62-010-XIB for CDN $19.00 per issue or CDN $62.00 for a one-year subscription. Users can obtain single issues or subscribe at http://www.statcan.ca/cgi-bin/downpub/feepub.cgi.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available
... figures not appropriate or not applicable
– nil or zero
-- amount too small to be expressed
p preliminary figures
r revised figures
x confidential to meet secrecy requirements of the Statistics Act

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres non disponibles
... n'ayant pas lieu de figurer
– néant ou zéro
-- nombres infimes
p nombres provisoires
r nombres rectifiés
x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (nº 62-001 au catalogue) et *Prix à la consommation et indices des prix* (nº 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique) Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures,* (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992,* Catalogue 62-554, and *Family Expenditure in Canada, 1992,* Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *Consumer Prices and Price Indexes,* (Quarterly), Catalogue 62-010-XPB. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992,* (hors série), nº 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992,* nº 62-554 au catalogue; et *Dépenses des familles au Canada, 1992,* nº 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *Prix à la consommation et indices des prix,* (trimestriel), nº 62-010-XPB au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

This publication was prepared under the direction of:

Louis Marc Ducharme, Director, Prices Division

Cynthia Baumgarten, Assistant Director, Prices Division

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.
∞

Appendix 1

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1996. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1992=100. The official time base was changed from 1986=100 to 1992=100 starting with the CPI for January 1998. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. In regions where the GST and provincial retail sales taxes have been combined, the Harmonized Sales Tax (HST) is included. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1996. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30,000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1992 = 100. On a changé la période de base de 1986 = 100 à 1992 = 100 à compter de l'IPC du mois de janvier 1998. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. Dans les régions où la TPS et la taxe provinciale de vente au détail ont été combinées, la taxe de vente harmonisée (TVH) est incluse. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre

of prices required for a given commodity depends on the importance and the nature of the commodity. The samples are designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1998, the basket reflecting the 1996 expenditure patterns replaced the 1992 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1996 and 1992. Because both sets of weights are expressed in December 1997 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 (Occasional) or contact Prices Division.

de prix nécessaires pour un bien ou service donné dépend de l'importance et de la nature de celui-ci. L'échantillon est conçu de façon à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1998, le panier qui retrace la composition des dépenses de 1996 a remplacé le panier de 1992. La continuité des séries de l'IPC est assurée par un «enchaînement» des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1996 et de 1992. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1997, qui est le «mois d'enchaînement», les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

[1] *Figures may not add to 100% due to rounding.*
[1] *Le total des chiffres ne donne pas forcément 100% à cause de l'arrondissement.*

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1997 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1992 and 1997, the All-items Canada CPI rose from 100.0 to 107.6, indicating that consumers had to pay 7.6% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1997 would purchase the same amount as 92.9¢ {(100.0 / 107.6) * 100¢} did in 1992. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1997 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1992 et 1997, l'IPC d'ensemble pour le Canada est passé de 100,0 à 107,6 : les consommateurs ont donc dû débourser 7,6% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1997 achèterait la même quantité de biens et de services que 92,9 cents {(100,0 / 107,6) * 100 cents} en 1992. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L' IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTER-CITY INDEXES OF RETAIL PRICE DIFFERENTIALS

Table 10 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly consumer price indexes.

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets as far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, the paired city item indexes were initially compared with their counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100.

The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city weighting patterns updated for price change to the time of the inter-city retail price comparison study.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occurring in each location. Furthermore, since the retail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

Footnotes for Table 10

(2) The weights shown are rounded 1992 weights for Canada as contained in the report **The Consumer Price Index Reference Paper, Updating based on 1992 Expenditures (Occasional),** Catalogue 62-553. They are provided for illustration only; the weights actually used are combined city weights with adjustments for price change since 1992.

(3) Includes the following sub-groups: sugar and syrups, confectionery items, margarine, other edible fat and oil items, coffee, tea, condiments, spices and vinegars, soup, infant and junior foods, pre-cooked frozen food preparations, non-alcoholic beverages and all other food preparations.

Appendice 3

INDICES COMPARATIFS DES PRIX DE DÉTAIL PAR VILLE

Le tableau 10 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie des relevés de prix utilisés pour la production de l'indice mensuel des prix à la consommation.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont d'abord été calculées séparément pour les paires de villes suivantes:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison des 11 villes étant égale à 100).

Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en applicant le schéma de pondération des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes.

Il convient de noter, surtout dans une période de fluctuation des prix, que les relations entre les prix de détail d'une ville à l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importants pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Notes pour le tableau 10

(2) Les pondérations indiquées sont les pondérations arrondies pour 1992 pour le Canada figurant dans le Document de référence de **l'indice des prix à la consommation, mise à jour fondée sur les dépenses de 1992**, catalogue 62-553. Elles ne sont fournies qu'à titre d'exemple; les pondérations utilisées en fait sont les pondérations combinés des villes rajustés en fonction des variations des prix observées depuis 1992.

(3) Comprend les sous-groupes suivants: sucre et sirop, confiserie, margarine, autres huiles et matières grasses comestibles, café, thé, condiments, épices et vinaigres, soupe, aliments pour bébés et enfants, préparations alimentaires précuites et congelées, boissons non-alcoolisées et toutes autres préparations alimentaires.

Appendix 4

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 4

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 15 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 15 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

Build on the range and depth of your knowledge and experience

Put the *power* of **Inter-Corporate Ownership** *1998* to work for **you**!

NEW!

When you're working to stay on top of the volatile business environment, and dealing with increased client expectations and escalating competition, you know success boils down to one thing. Performance. ***Inter-Corporate Ownership 1998*** helps you meet **your** standards of excellence by providing you with accurate, timely and comprehensive business ownership information, while saving you valuable research time. Use this definitive guide to learn at a glance who owns and controls which companies, where their head offices are located, how they fit into the corporate hierarchy, and much more.

Knowledge = Power

Inter-Corporate Ownership 1998 provides you with **value-added** features you simply **cannot** get anywhere else, including:

- **89,000** comprehensive company listings, with approximately **11,000** foreign parent companies
- **tens of thousands more listings** than any comparable resource
- meticulously organized data, fully indexed for quick searches and easy cross referencing
- a **choice** of formats to better meet **your** particular information needs:
  - ★ CD-ROM ★ hard-cover book

An indispensable resource for lawyers, analysts, investors, lobbyists, researchers and corporate executives, ***Inter-Corporate Ownership 1998*** will help you to:

- identify corporate pyramids and explore investment opportunities
- pinpoint marketing opportunities and target the right decision makers
- locate potential customers and learn about competitors
- trace changes in foreign control and uncover export opportunities
- fulfill due diligence requirements

Research business ownership questions more **quickly**, **reliably** and **easily** with ***Inter-Corporate Ownership 1998***. Put its powerful contents to work for you!

Special package offers on *ICO 98* Book & CD-ROM now available!

Save 15%-20%!

Inter-Corporate Ownership 1998 — Book (Cat. No. 61-517-XPB) is $350.
Inter-Corporate Ownership 1998* on *CD-ROM (Cat. No. 61-517-XCB) costs $995 for an annual subscription or $350 for a single quarterly issue.
Special Package Offers: *ICO 98* Book & CD-ROM annual subscription costs $1076.
ICO 98 Book & CD-ROM current quarterly issue costs $595. ALL PRICES EXCLUDE SALES TAX. For brief queries on individual company listings, contact an account executive at one of the regional reference centres listed in this publication.

To order, **CALL** toll-free at 1 800 267-6677, **FAX** your VISA, MasterCard order to 1 800 889-9734 or **MAIL** your order to Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6. Or contact your nearest Statistics Canada Regional Reference Centre listed in this publication. You may also order via **E-MAIL**: ***order@statcan.ca***.

Soyez à la fine pointe de votre savoir-faire et de votre expérience

Tirez *profit* de **Liens de parenté entre sociétés** *1998*

NOUVEAU!

Pour demeurer compétitif dans le monde changeant des affaires, pour faire face à l'augmentation des attentes des clients et à l'escalade de la concurrence, vous savez que le succès se résume en un seul mot. Rendement. ***Liens de parenté entre sociétés 1998*** vous aide à atteindre **vos** normes d'excellence en vous fournissant des renseignements exacts, actuels et complets sur les sociétés, tout en vous épargnant du temps précieux de recherche. C'est un guide complet pour connaître, d'un coup d'oeil, qui possède et contrôle quelles sociétés, où se trouvent leurs sièges sociaux, comment ces sociétés s'imbriquent dans la hiérarchie globale et bien d'autres renseignements.

Savoir-faire = Pouvoir

Liens de parenté entre sociétés 1998 vous procure des caractéristiques **à valeur ajoutée** que vous ne pouvez tout simplement pas retrouver ailleurs, y compris :

- **89 000** inscriptions détaillées, dont celles d'environ **11 000** sociétés-mères étrangères
- **des dizaines de milliers d'inscriptions de plus** que toute source comparable
- des données rassemblées avec précision, entièrement indexées pour des recherches rapides et des renvois faciles
- un **choix** de formats pour mieux satisfaire **vos** besoins particuliers :
  - ★ CD-ROM ★ livre relié

Une source indispensable pour les juristes, les analystes, les investisseurs, les lobbyistes, les chercheurs et les chefs d'entreprises, ***Liens de parenté entre sociétés 1998*** vous aidera à :

- identifier les hiérarchies des sociétés et à explorer des possibilités d'investissements
- pointer les possibilités de marketing et à cibler les vrais décideurs
- reconnaître des clients potentiels et à connaître vos concurrents
- suivre les changements de propriété à l'étranger et à découvrir des débouchés à l'exportation
- répondre à des exigences de «célérité raisonnable»

Liens de parenté entre sociétés 1998 répond plus rapidement, plus adéquatement et plus facilement aux questions sur les différentes sociétés. Mettez son incroyable contenu à votre service!

Offres spéciales pour le livre *LPS 1998* & le CD-ROM disponibles maintenant!

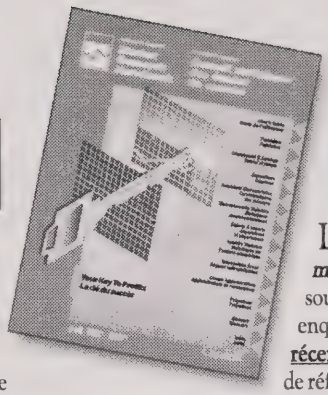

Épargnez de 15 % à 20 %!

Liens de parenté entre sociétés 1998 — Livre (N° 61-517-XPB au catalogue) se vend 350 $.
Liens de parenté entre sociétés 1998* sur *CD-ROM (N° 61-517-XCB au catalogue) se vend 995 $ pour un abonnement annuel ou 350 $ pour un seul numéro trimestriel. Market Research Handbook 1998

Unlock Canadian Consumer and Business Markets...

The ALL-NEW *Market Research Handbook 1998* reveals the Canadian marketplace the way no other statistical resource can. It delivers **first hand** results from more than 20 specialized Statistics Canada surveys, plus the very latest details from the **1996 Census**, in one practical sourcebook!

For entrepreneurs, market researchers, planners and analysts, for big business and small, *Market Research Handbook 1998* is an invaluable and comprehensive decision-support tool.

Capitalize on opportunities...

- spot emerging market trends
- position your products effectively
- gain a competitive edge in an increasingly volatile and competitive economy

... and manage the future of your market!

Analyze the conditions in your market – from the local to the national level – using:

Key Demographic Variables

- population
- education
- age
- sex
- retail sales
- earnings
- household expenditures
- and more!

Vital Economic Indicators

- labour force productivity
- private and public investment
- consumer and industrial price indexes
- international trade data
- Gross Domestic Product
- and more!

Business Demographics

- by industry
- urban area
- size of business
- plus more!

NEW FOR 1998!

- very latest FAMEX survey data
- helpful *User's Guide*
- help-line phone numbers to connect you **directly** to analysts and specialists
- CANSIM data references
- over **145 statistical tables**, enhanced by over **60 charts and graphs**
- complete data source for follow-up research
- unparalled demographic and economic information on 45 urban centres across Canada

Market Research Handbook 1998 (Cat. No. 63-224-XPB) costs $125 in Canada (plus either HST or GST and applicable PST) and US$125 outside Canada.
To order, **CALL** toll-free at 1 800 267-6677, **FAX** 1 800 889-9734 or **MAIL** your order to Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, Canada K1A 0T6. Or contact your nearest Statistics Canada Regional Reference Centre listed in this publication. You may also order via E-MAIL: **order@statcan.ca**

Recueil statistique des études de marché 1998

Pénétrez les marchés de consommation et d'affaires canadiens ...

Le TOUT DERNIER *Recueil statistique des études de marché 1998* fait état du marché canadien comme aucune autre source statistique ne le fait. Il réunit les résultats de plus de 20 enquêtes spéciales de Statistique Canada, de même que les plus récentes données du Recensement de 1996, dans un seul guide de référence pratique!

Pour les entrepreneurs, comme pour les spécialistes des études de marché, les planificateurs et les analystes, de même que pour les grandes et petites entreprises, le *Recueil statistique des études de marché 1998* constitue un outil complet de très grande valeur.

Tirez profit des possibilités...

- repérez les nouvelles tendances
- positionnez vos produits efficacement
- obtenez un avantage concurrentiel au sein d'une économie de concurrence sans cesse changeante

... et gérez l'avenir de votre marché!

Analysez les conditions de votre marché – à l'échelle régionale ou nationale – en utilisant :

Les principales variables démographiques

- population
- scolarité
- dépenses des ménages
- âge
- sexe
- ventes au détail
- revenu
- et plus!

Les indicateurs économiques

- données sur la productivité de la population active
- investissements privés et publiques
- indices des prix à la consommation et de l'industrie
- commerce international
- produit intérieur brut
- et plus!

La démographie des entreprises

- secteur d'activité
- région urbaine
- taille de l'entreprise
- et plus!

NOUVEAU POUR 1998!

- les données les plus récentes de l'Enquête sur les dépenses des familles
- un guide d'utilisateur
- des numéros d'aide téléphonique vous permettant de communiquer directement avec les experts qui recueillent et analysent les données
- des références aux matrices de données CANSIM
- plus de **145 tableaux statistiques,** mis en valeur par quelque **60 graphiques**
- des renseignements sur les sources
- de l'information socioéconomique incomparable sur 45 grandes villes du Canada

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this product and related statistics or services should be directed to: Information and Current Analysis Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606) or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(780) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020		

You can also visit our World Wide Web site:
http://www.statcan.ca

Toll-free access is provided **for all users who reside outside the local dialing area** of any of the Regional Reference Centres.

National enquiries line	**1 800 263-1136**
National telecommunications device for the hearing impaired	**1 800 363-7629**

For changes of address, please provide both old and new addresses. Statistics Canada products may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

This product is also available on the Internet as Catalogue no. 62-010-XIB for CDN $19.00 per issue or CDN $62.00 for a one-year subscription. Users can obtain single issues or subscribe at http://www.statcan.ca/cgi-bin/downpub/feepub.cgi.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available
... figures not appropriate or not applicable
– nil or zero
-- amount too small to be expressed
p preliminary figures
r revised figures
x confidential to meet secrecy requirements of the Statistics Act

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres non disponibles
... n'ayant pas lieu de figurer
– néant ou zéro
-- nombres infimes
p nombres provisoires
r nombres rectifiés
x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (nº 62-001 au catalogue) et *Prix à la consommation et indices des prix* (nº 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique) Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures,* (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992,* Catalogue 62-554, and *Family Expenditure in Canada, 1992,* Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Index,* (Monthly), Catalogue 62-001-XPB. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992,* (hors série), nº 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992,* nº 62-554 au catalogue; et *Dépenses des familles au Canada, 1992,* nº 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation,* (mensuel), nº 62-001-XPB au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

This publication was prepared under the direction of:

Louis Marc Ducharme, Director, Prices Division

Cynthia Baumgarten, Assistant Director, Prices Division

Cette publication a été rédigée sous la direction de:

Louis Marc Ducharme, Directeur, Division des prix

Cynthia Baumgarten, Directeur adjoint, Division des prix

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Note to readers

To streamline operations and reduce costs, Prices Division is discontinuing the publication *Consumer Prices and Price Indexes*, Catalogue no. 62-010-XPB. **This is the last issue**.

Information on price indexes and average retail prices are available monthly from the publication *The Consumer Price Index*, Catalogue no. 62-001. Consumer Price Index data and other Statistics Canada data are available, free or for a charge, on the Internet at, **www.statcan.ca/start.html**. Additionally, the Client Services Unit of Prices Division or a Statistics Canada Regional Reference Center would be happy to assist you with your data requirements. For information on how to contact the Client Services Unit of Prices Division or the Regional Reference Centres, please consult the inside cover of this publication.

Note aux lecteurs

Dans le cadre de l'exercice de rationalisation des activités et de réduction des coûts, la Division des prix a décidé d'interrompre la publication *Prix à la consommation et indices des prix*, nº 62-010-XPB au catalogue. **Ceci est le dernier numéro**.

Les renseignements au sujet des indices des prix et des prix de détail moyens sont publiés mensuellement dans la publication *Indice des prix à la consommation*, nº 62-001 au catalogue. Les données de l'Indice des prix à la consommation et d'autres données de Statistique Canada sont disponibles, gratuitement ou moyennant certains frais, sur Internet à l'adresse **www.statcan.ca/start_f.html**. De plus, la Sous-section des services à la clientèle de la Division des prix ou l'un des centres régionaux de consultation de Statistique Canada vous aideront à trouver les données dont vous avez besoin. Pour obtenir des renseignements sur la façon de communiquer avec la Sous-section des services à la clientèle de la Division des prix ou les centres de consultation régionaux de Statistique Canada, veuillez consulter le verso de la page couverture de cette publication.

Appendix 1

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1996. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1992=100. The official time base was changed from 1986=100 to 1992=100 starting with the CPI for January 1998. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. In regions where the GST and provincial retail sales taxes have been combined, the Harmonized Sales Tax (HST) is included. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1996. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30,000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1992 = 100. On a changé la période de base de 1986 = 100 à 1992 = 100 à compter de l'IPC du mois de janvier 1998. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. Dans les régions où la TPS et la taxe provinciale de vente au détail ont été combinées, la taxe de vente harmonisée (TVH) est incluse. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre

of prices required for a given commodity depends on the importance and the nature of the commodity. The samples are designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1998, the basket reflecting the 1996 expenditure patterns replaced the 1992 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1996 and 1992. Because both sets of weights are expressed in December 1997 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 (Occasional) or contact Prices Division.

de prix nécessaires pour un bien ou service donné dépend de l'importance et de la nature de celui-ci. L'échantillon est conçu de façon à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1998, le panier qui retrace la composition des dépenses de 1996 a remplacé le panier de 1992. La continuité des séries de l'IPC est assurée par un «enchaînement» des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1996 et de 1992. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1997, qui est le «mois d'enchaînement», les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

TEXT TABLE 1
Comparison of the 1996 and 1992 Distribution[1] of Expenditures used in the Consumer Price Index, by Major Component, for Canada

TABLEAU EXPLICATIF - 1
Comparaison des ventilations[1] des dépenses de 1996 et 1992 utilisées pour l'indice des prix à la consommation, par composante principale, pour le Canada

Major Components	1996 Expenditures / Dépenses de 1996 — Expressed in 1996 prices / Exprimées en prix de 1996	1996 Expenditures / Dépenses de 1996 — Expressed in Dec. 1997 prices / Exprimées en prix de Déc. 1997	1992 Expenditures / Dépenses de 1992 — Expressed in Dec. 1997 prices / Exprimées en prix de Déc. 1997	Composantes principales
All-items	**100.0**	**100.0**	**100.0**	**Ensemble**
Food	17.8	17.9	18.1	Aliments
Shelter	27.1	26.8	26.9	Logement
Household operations and furnishings	10.7	10.8	10.1	Dépenses et équipement du ménage

Alcoholic beverages and tobacco products	3.4	3.5	4.6	Boissons alcoolisées et produits du tabac

[1] *Figures may not add to 100% due to rounding.*
[1] *Le total des chiffres ne donne pas forcément 100% à cause de l'arrondissement.*

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1997 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1992 and 1997, the All-items Canada CPI rose from 100.0 to 107.6, indicating that consumers had to pay 7.6% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1997 would purchase the same amount as 92.9¢ {(100.0 / 107.6) * 100¢} did in 1992. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1997 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1992 et 1997, l'IPC d'ensemble pour le Canada est passé de 100,0 à 107,6 : les consommateurs ont donc dû débourser 7,6% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1997 achèterait la même quantité de biens et de services que 92,9 cents {(100,0 / 107,6) * 100 cents} en 1992. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average Retail Prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L' IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTER-CITY INDEXES OF RETAIL PRICE DIFFERENTIALS

Table 10 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly consumer price indexes.

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets as far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, the paired city item indexes were initially compared with their counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100.

The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city weighting patterns updated for price change to the time of the inter-city retail price comparison study.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occurring in each location. Furthermore, since the retail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

Footnotes for Table 10

(2) The weights shown are rounded 1996 weights for Canada. They are provided for illustration only; the weights actually used are combined city weights with adjustments for price change since 1996.

(3) Includes the following sub-groups: sugar and syrups, confectionery items, margarine, other edible fat and oil items, coffee, tea, condiments, spices and vinegars, soup, infant and junior foods, pre-cooked frozen food preparations, non-alcoholic beverages and all other food preparations.

Appendice 3

INDICES COMPARATIFS DES PRIX DE DÉTAIL PAR VILLE

Le tableau 10 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie des relevés de prix utilisés pour la production de l'indice mensuel des prix à la consommation.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont d'abord été calculées séparément pour les paires de villes suivantes:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison des 11 villes étant égale à 100).

Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en applicant le schéma de pondération des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes.

Il convient de noter, surtout dans une période de fluctuation des prix, que les relations entre les prix de détail d'une ville à l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importants pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Notes pour le tableau 10

(2) Les pondérations indiquées sont les pondérations arrondies pour 1996 pour le Canada. Elles ne sont fournies qu'à titre d'exemple; les pondérations utilisées en fait sont les pondérations combinés des villes rajustés en fonction des variations des prix observées depuis 1996.

(3) Comprend les sous-groupes suivants: sucre et sirop, confiserie, margarine, autres huiles et matières grasses comestibles, café, thé, condiments, épices et vinaigres, soupe, aliments pour bébés et enfants, préparations alimentaires précuites et congelées, boissons non-alcoolisées et toutes autres préparations alimentaires.

Appendix 4

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 4

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créé. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la revision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Table 15 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Le tableau 15 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

Success is within your reach

when you subscribe to the *Canadian Economic Observer*!

Understanding what is key to Canada's economic activity is important to virtually *every* successful business, particularly in today's highly competitive economy. Whether your company has 10 employees or 10,000, it's vital that you are equipped to anticipate the trends that could prove influential in the years ahead. One way is to subscribe to Canada's leading report card on the economy — the ***Canadian Economic Observer (CEO)***.

▶ *CEO* meets your needs

Whether your job requires you to access data, track trends or devise highly effective business plans, you'll find many uses for ***CEO***. Packed with detailed charts, diagrams and tables, ***CEO*** is your hands-on tool for understanding the economy from the inside out. And ***CEO*** gives you the kind of in-depth, intelligent analysis you have come to expect from the world's leading statistical agency.

▶ *CEO* is easy to use

Consultations with experts have contributed to ***CEO***'s present, widely acclaimed format. The **Current Economic Conditions** section contains thought-provoking commentary on current issues, trends and developments. Economic growth, trade, financial market activity — all of the major economic developments across Canada are covered month to month, issue by issue.

The **Economic Events** section profiles developments in the previous month that had an impact on the economy. ***Plus***, ***CEO*** has a topical **Feature Article** providing thoughtful insight into issues that either directly or indirectly affect all Canadians. A separate **Statistical Summary** carries a full range of hard data relating to important economic indicators: markets, prices, trade, demographics, unemployment and many others.

▶ *CEO* offers solutions

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts. You'll also receive a copy of ***CEO***'s annual ***Historical Statistical Summary*** at no additional charge.

VISIT OUR WEB SITE!

Subscribe to the ***Canadian Economic Observer*** (Catalogue # 11-010-XPB) TODAY for only $227 in Canada plus GST/HST and applicable PST and US$227 in other countries. Call **TOLL-FREE** 1-800-267-6677 or **FAX** 1-800-889-9734 or (613) 951-1584 and use your VISA or MasterCard. You can also **MAIL** your order to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Le succès est à la portée

des abonnés à *L'Observateur économique canadien*!

Il est important pour à peu près *toutes* les entreprises prospères de comprendre les grandes lignes de l'activité économique, surtout dans l'économie concurrentielle d'aujourd'hui. Que votre entreprise compte dix, cent ou plus de mille employés, vous voudrez sans doute vous équiper en vue d'anticiper les tendances qui peuvent exercer une influence sur les années à venir. Un bon moyen consiste à vous abonner au principal bulletin de santé économique du Canada : ***L'Observateur économique canadien (L'OEC)***.

▶ *L'OEC* répond à vos besoins

Que vous ayez à consulter des données, à répérer de grandes tendances ou à concevoir des plans d'entreprises efficaces, ***L'OEC*** répondra à nombre de vos besoins. Rempli de tableaux, de graphiques et de diagrammes détaillés, ***L'OEC*** est l'outil pratique par excellence pour comprendre les arcanes de la conjoncture économique. De plus, ***L'OEC*** vous offre le type d'analyse fouillée et intelligente à laquelle vous vous attendez d'un leader mondial dans le domaine de la statistique.

▶ *L'OEC* est simple à utiliser

Des consultations avec plusieurs experts ont fait en sorte que le nouveau format de ***L'OEC*** reçoit aujourd'hui un accueil enthousiaste de la part de nos nombreux lecteurs. La section des **Conditions économiques actuelles** comprend des commentaires percutants sur des questions, des tendances et des développements économiques. La croissance économique, le commerce, l'activité des marchés financiers – les événements économiques marquants au Canada sont examinés dans chaque numéro mensuel.

La section **Événements économiques** regroupe les faits d'actualité ayant eu un impact majeur sur l'économie au cours du mois précédent. ***En plus***, ***L'OEC*** comprend une **Étude spéciale** qui examine en profondeur des sujets qui touchent directement ou indirectement presque tous les Canadiens et Canadiennes. Enfin, **l'Aperçu statistique** contient l'ensemble des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

▶ *L'OEC* vous offre des solutions

En tant qu'abonné, vous profiterez d'une communication directe avec les analystes de Statistique Canada. Vous recevrez également, sans frais additionnels, un exemplaire du ***Supplément statistique historique de L'OEC***.

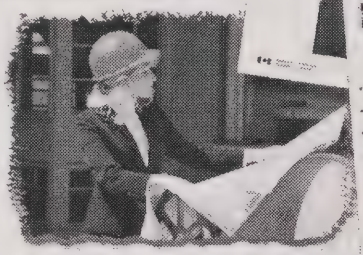

VISITEZ NOTRE SITE INTERNET!

Perspectives on Labour and Income

Crucial to leading decision makers

The current emphasis on information resonates loudly in the workplace. ***Perspectives on Labour and Income*** meets your need for accurate, timely and comprehensive information. The bottom line? You get vital data and analysis on the workplace and related issues facing contemporary Canada!

Your springboard to success

Each analytical article in this quarterly journal has clear charts, tables and summaries.

Perspectives reveals the latest labour and demographic statistics – essential to

- determine how attitudes toward retirement influence investment decisions
- evaluate the effect of wage trends on union bargaining
- forecast the effect of employment on the demand for goods and services or social programs
- compare your organization within your industry
- develop labour market studies
- ... and much more!

L'emploi et le revenu en perspective

Un outil essentiel pour les décideurs

De nos jours, on attache beaucoup d'importance à l'information en milieu de travail. La revue ***L'emploi et le revenu en perspective*** répond à vos besoins pour des renseignements qui sont à la fois précis, actuels et complets. Vous disposerez alors de données essentielles et d'analyses sur le milieu du travail et sur d'autres défis auxquels le Canada est confronté!

Le tremplin à votre succès

Les articles analytiques de cette revue trimestrielle comportent des graphiques, des tableaux et des sommaires conçus de façon à présenter clairement les statistiques sur le marché du travail et les statistiques démographiques qui sont essentielles pour :

- déterminer dans quelle mesure les attitudes à l'égard de la retraite influent sur les décisions en matière de placements
- évaluer l'effet des tendances salariales sur les négociations syndicales
- faire des prévisions relatives à l'incidence de l'emploi sur la demande de biens et de services ou sur les programmes sociaux
- comparer votre organisation à votre branche d'activité dans son ensemble
- effectuer des études sur le marché du travail
- ... et bien plus encore!
